

Aedgency delivers innovative digital advertising for people to engage with brands in a personalized experience. Experts at developing real-time bidding (RTB) technologies, it serves billions of relevant, multi-format and multi-device offers at a global scale.

Aedgency offers its publishers a variety of smart, data-driven solutions using native programmatic algorithms to maximize the profitability of each impression and their fill rate. While it is committed to providing advertisers with traffic volume and targeting tools to reach their audience.

An international team united behind something big. Together, we work hard, we laugh a lot, we cover our walls with Post-Its, we minute-brainstorm all day and we eat the best organic fruits in town. Founded in 2004, Aedgency is a privately-held company. Headquartered in European Tech Capital Barcelona, we have satellite team members everywhere in the world.

To support our growth, we are looking for the most talented, passionate, enthusiastic people in the industry.

POSITION: DATA ENGINEER

WE ARE LOOKING FOR A BIG DATA ENGINEER TO JOIN TO THE DATA TEAM.

Your main duties will be:

- To collect, store, process, transform and analyse data in order to extract value using technologies like Elasticsearch, Redis, Memcached, Amazon EMR, MySQL, Apache Spark
- To provide the required information to guide business decisions

Required skills & Experience:

- Passionate about his/her work
- Proven experience in data integration from multiple sources and data storage repositories
- Experience in NoSQL technologies (Elasticsearch / Logstash / Kibana stack, Spark, Cassandra, ...)
- Experience developing and implementing scripts to process data in PHP & Python
- Experience in Amazon Web Services, deploying distributed jobs
- Knowledge of Linux OS (bash scripting, basic operations)
- Knowledge of relational databases (Mysql, Oracle)
- Strong teamwork and interpersonal skills
- Quick learner and good analytical skills
- Ability to solve issues about data processes and results (troubleshooting and errors analysis)
- A passion for Data is a must

Would be a plus:

- Knowledge of visualization tools (Tableau, Pentaho, ...)

What's in it for you?

- Challenging work in a dynamic international environment and great potential for development
- Training from day one, attending conferences, fairs, etc.
- Cooperation and possibility to exchange knowledge with a team of professionals from a global player in advertising industry
- Competitive annual salary
- Annual bonus scheme
- Medical and dental insurance
- Gym, lunch and nursery vouchers
- Office location in sunny tech city Barcelona

Take your career to the next level. Apply today!
